

Raul Plascencia

Full-Stack Software Engineer

rplasc.2025@gmail.com | 805.354.4466 | Guadalupe, CA | github.com/rplasc | raulplascencia.dev

PROFILE

Full-stack Software Engineer with expertise in designing responsive UIs and backend solutions. Proven track record in architecting scalable software and optimizing CI/CD pipelines in Azure, enhancing deployment efficiency. Strong background in AI workflows and training. Specializes in integrating cloud services and delivering high-performing applications across platforms.

WORK EXPERIENCE

Gaine Technology

Full-stack Software Development Engineer

Feb. 2026 – May 2026

San Luis Obispo, CA

Designed and developed full-stack features using Angular 21 for responsive UI and C# .NET 10 for backend functionality. Implemented automated CI/CD pipelines in Azure to streamline deployments. Implemented application security and compliance to meet HIPAA standards, including auditing and secure session management.

- Architected scalable software solutions.
- Optimized deployment processes with Azure CI/CD.
- Enhanced security protocols to meet compliance standards.

Handshake AI Fellowship

AI Trainer – Multimodal Evaluation (Contract)

Dec. 2025 – Feb. 2026

Remote

Evaluated multimodal model outputs to enhance LLM accuracy and reliability. Developed domain-specific prompts for assessing LLM reasoning, clarity, and factual consistency. Provided structured feedback to refine model behavior in specialized technical tasks. Ensured adherence to baseline scoring standards and quality metrics for project compliance.

- Enhanced model accuracy through rigorous evaluation of outputs.
- Created prompts that improved assessment of LLM performance.
- Delivered actionable feedback to optimize model functionality.
- Maintained compliance with established quality Metrics

sweep

Software Engineer Intern (Technical Lead)

Jan. 2025 – May 2025

Merced, CA

Led technical aspects of a client project, delivering a cross-platform mobile application for file synchronization. Architected a secure RESTful API using Flask, integrating Rclone for syncing with Google Drive and Dropbox. Developed front-end with React Native, collaborating with UI/UX designers to create intuitive interfaces and enhance Android app performance.

- Delivered a mobile app that syncs files to a centralized server.
- Integrated cloud services, improving data accessibility.
- Collaborated with designers to optimize user experience.
- Enhanced application performance on Android platforms.

EDUCATION

University of California, Merced

B.S. Computer Science and Engineering

Aug. 2025

Merced, CA

TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript, Python, Java, C++, SQL
- **Frameworks:** Angular, .NET 10, React, Node.js, Flask, FastAPI, React Native
- **Cloud/DevOps:** Azure, CI/CD, Docker, Firebase
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools/Agile:** Jira, Confluence, Git, Postman, Figma
